MAPS AND CHARTS

This Index includes only such references to maps and charts prepared by the Office of Foreign Agricultural Relations as were considered of general interest. New maps and charts are continually being made to illustrate our reports and articles.

We will be pleased to supply additional information on request regarding other maps and charts we have and which are not included in this Index due to their limited interest. It is expected that we will issue a "supplement" on a yearly basis indexing the maps and charts prepared in the preceding year.

ATLASSES

Agricultural Geography of Europe and the Near East

For sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C. Sales price \$1.00 a copy.

We have only the negatives of the black and white illustrations in our files from which prints may be ordered (see the "Key" list for identification of these.)

A Graphic Summary of World Agriculture

For sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C. Sales price 30 cents a copy.

The negatives in our files from which prints may be ordered do not show the ripples for water areas nor the stipples for land areas; in other respects they are identical (see the "Key" list for identification of these).

Agricultural Geography of the Philippines

Limited free distribution. (See the "Key" list for identification of these maps and charts.)

Other maps and charts indexed have been used to illustrate the publications issued by this Office. In instances where a number of maps and charts have appeared in a single report or in a publication series, these have been identified by a "Key" number (see list below).

Our publications are on file in all Government depository libraries, most college and university libraries, and public libraries. An index to our publications is issued annually (January) entitled, Published Information on Agriculture in Foreign Countries.
